

LMP INCREMENT 2

SUPPORTING AMC'S MISSION:

ARMY READINESS

LMP INCREMENT 2...

EQUIPS

the Army and Soldiers with materiel - anytime...anywhere

SUSTAINS

the Army's strategic logistics position while building on the LMP deployed operational / production baseline (Increment 1), improving the productivity and competitiveness of the Army Materiel Command (AMC) Lifecycle Management Command (LCMC) depots, arsenals, and ammunition plants

INTEGRATES

the way much of the Army's logistics work is done and the way it works with other Army Enterprise Resource Planning (ERP) programs

ENABLES

the Army's capability to manage assets from the top floor to the shop floor by improving productivity through automation

THERE'S STRONG... AND THEN THERE'S ARMY STRONG.

The strength of our nation rests with our Army and the strength of our Army rests in our Soldiers. It's critical, then, that the systems providing materiel to Soldiers where and when they need it only further strengthen their ability to complete their mission. The U.S. ARMY LOGISTICS MODERNIZATION PROGRAM (LMP) has been strengthening the Army since 2003, with advanced capabilities to track and manage maintenance, repair, and overhaul orders. As enhancements continue through the LMP INCREMENT 2 to the shop floor, the LMP will only deepen the support it provides to Soldiers and ensure we remain Army Strong.
