THE LITTLE THINGS

I've been told many times in my Army aviation career that it's the little things that will come up and bite you. While this bit of advice has served me well throughout my career and life in general, a motorcycle accident that happened to a fellow aviator several years ago really drove this point home.

NEGLIGENT DISCHARGE

In a rush to get the bump aircraft run up, the pilot in command passed in front of the weapon the door gunner was carrying. He arrived at the aircraft an instant before the door gunner placed the weapon on the ground. Then, the inevitable happened.

ENFORCING THE STANDARDS

Supervisors have a responsibility to enforce safety standards. When employees understand the hazards, have the correct personal protective equipment that fits and are adequately trained how to use it, they are more likely to perform to the standard.
